 Health Community clinics and mental health	07
 Environment Trees, retrofits and clean air	09
 Communities Grants, housing and local groups	11
 Finance Where the money came from and went	13

HOW TO READ THIS REPORT

Each programme has its own colour. The strip at the top of every page shows where you are: the current programme's colour drops down as a tab.

We measure a good year by the number of people who no longer need us.

Lumen Foundation was set up eleven years ago with one idea: that a city's problems are connected, so the answers should be too. A child who reads well, a family in a warm home and a street with clean air are parts of the same story.

In 2025 we reached 214,000 people through five programmes, more than in any previous year. We opened two new community clinics, planted our 50,000th tree and gave 640 grants to local groups, most of them under 5,000.

Dr Amara Lindqvist

Director, Lumen Foundation

This report is organised by programme. Each has its own colour, so you can follow one thread or read the whole picture. Every figure is checked by our independent evaluation partner.

None of this would be possible without 3,400 volunteers, 61 partner organisations and the donors who trusted us with their money. Thank you. The work is not finished, and next year we will ask even more of ourselves.

2025 IN FIVE MOMENTS

FEB

Maths tutoring pilot starts in six schools

MAR

Eastfield clinic opens its doors

JUN

The 50,000th street tree is planted

SEP

Harbour hub opens for local groups

DEC

Running costs stay below 8%

OVERVIEW

2025 AT A GLANCE

EDUCATION

38,600

children in reading and tutoring programmes

HEALTH

92,400

clinic visits across six community clinics

ENVIRONMENT

13,600 t

of CO₂ avoided through trees and retrofits

COMMUNITIES

640

grants to local groups, worth 6.8 million

WHERE THE MONEY WENT

Education	34%
Health	27%
Environment	18%
Communities	14%
Running the foundation	7%

Every child reading by age eleven

Tutoring, libraries and breakfast clubs in 84 schools, focused on the neighbourhoods where reading scores lag.

38,600

children reached, up 24% on 2024

84

partner schools, 19 of them new

+9 pts

rise in age-11 reading scores at partner schools

Reading by eleven is the single best predictor we have of how a child does at sixteen. That is why most of the education budget goes to one-to-one tutoring in the last two years of primary school.

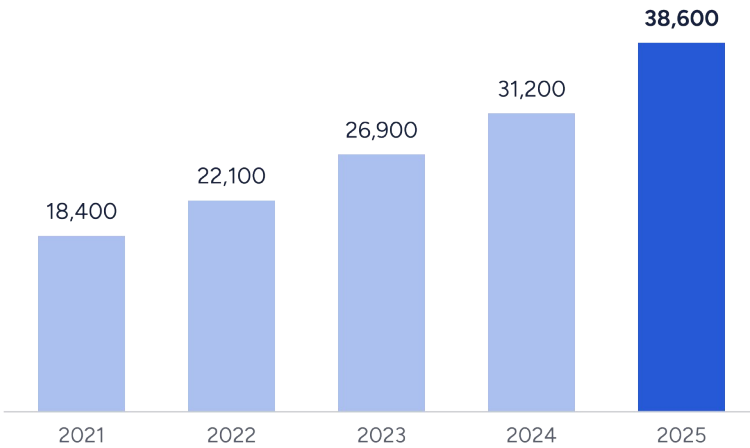

In 2025, 2,100 trained volunteers gave 146,000 hours of tutoring. Schools choose the children, and every child is tested at the start and end of the year so we can see what works.

Breakfast clubs now run in 52 schools and serve 9,800 children a day. Teachers tell us that attendance and concentration in the first lesson have both improved.

Next year we will add maths tutoring in 20 schools, using the same model and the same measurement.

MORE CHILDREN, EVERY YEAR

FIGURE 1 — CHILDREN REACHED, 2021–2025

Growth came from new schools, not bigger classes.

Each school keeps the same tutor-to-child ratio of one to three, so quality holds as numbers rise.

CASE STUDY · RIVERSIDE PRIMARY

From the bottom ten to the city average in two years

Riverside joined the programme in 2023 with one of the lowest reading scores in the city. Two years and 3,800 tutoring hours later, 71% of its eleven-year-olds read at the expected level, against 74% across the city. The school now trains other schools' volunteers.

My tutor never got bored of the same book. Now I pick my own.

PUPIL, AGE TEN, RIVERSIDE PRIMARY

Care close to home

Six community clinics, a mental-health line and home visits for people who find it hard to get to a doctor.

92,400

clinic visits, 18% more than in 2024

6

community clinics, two opened in 2025

4 days

average wait for a first appointment

Our clinics sit in community centres, not hospitals. They are open in the evening and on Saturdays, and most visits are booked by phone or simply by walking in.

The two new clinics in Eastfield and Harbour opened in March and September. Together they saw 21,000 visits in their first months, mostly for long-term conditions such as diabetes and asthma.

The mental-health line took 14,200 calls. Two thirds of callers were offered a follow-up session within a week, and 83% said the call helped.

Home visits reached 1,900 older or disabled residents, many of whom had not seen a health professional in more than a year.

CLINICS IN 2025

TABLE 1 — VISITS AND WAITING TIMES BY CLINIC

CLINIC	OPENED	VISITS	CHANGE	WAIT (DAYS)	SATISFIED
Northside	2016	21,300	+6%	3	94%
Riverside	2018	18,900	+4%	4	92%
Old Town	2019	16,700	+9%	5	91%
Westgate	2021	14,500	+12%	4	93%
Eastfield	2025	12,800	new	3	95%
Harbour	2025	8,200	new	6	90%
All clinics		92,400	+18%	4	93%

Wait = average days from first contact to first appointment. Satisfaction from exit surveys. Illustrative.

WHAT CHANGED

Evening sessions halved missed appointments

Clinics that opened until 8 pm saw missed appointments fall from 14% to 7%, mostly among working parents.

I came in on my way home from work. Nobody made me feel I was wasting their time.

PATIENT, EASTFIELD CLINIC

2

more clinics planned for 2026, in Westgate North and Millbrook

24/7

mental-health line from April, with trained volunteers overnight

3 days

target wait for a first appointment by the end of 2026

Cleaner air, warmer homes

Street trees, home retrofits and school-run clean-air zones in the neighbourhoods with the worst air.

50,000

trees planted since 2019, 9,400 of them this year

1,240

homes insulated, saving 310 a year each

-22%

nitrogen dioxide outside 30 schools

The environment programme works where pollution and fuel poverty overlap. In those streets, a tree, an insulated loft or a car-free school gate makes the biggest difference to health and household bills.

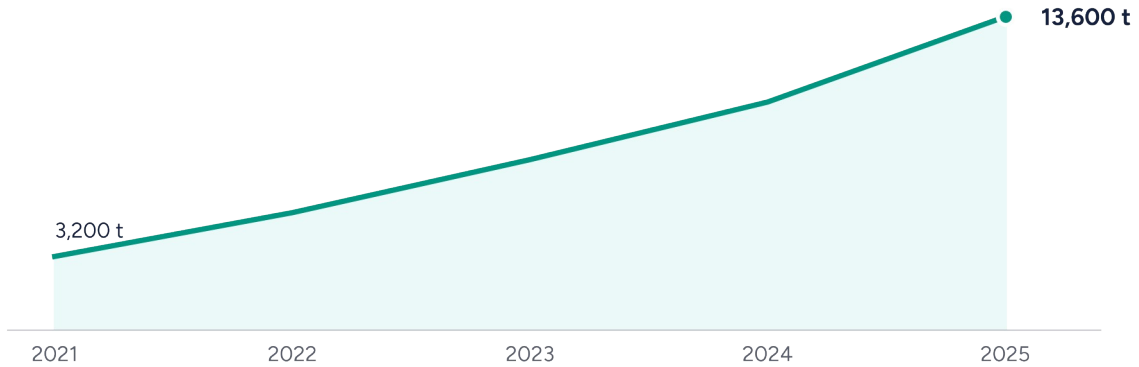

Volunteers planted 9,400 street trees this year, chosen with residents. Survival after two years is 91%, well above the city's own planting.

The retrofit scheme insulated 1,240 homes, all of them for households on low incomes, at no cost to the occupants. Average heating bills fell by 310 a year.

Clean-air zones now cover the school run at 30 primary schools, with traffic closed for 45 minutes at each end of the day.

CARBON AVOIDED IS GROWING FAST

HOW A RETROFIT WORKS

01

Referral

From a GP, school or neighbour, or by calling us.

02

Survey

A free home survey within two weeks.

03

Install

Loft, wall and draught-proofing in one visit.

04

Follow-up

We check bills and comfort after one winter.

CASE STUDY · ALDER STREET

Forty homes, one street, one winter

Alder Street was insulated house by house over six weeks in the autumn. Residents' heating bills fell by an average of 34%, and damp complaints to the housing association dropped from 17 to two.

04

PROGRAMME 04 · COMMUNITIES

Small grants, big difference

Grants, advice and space for the local groups that know their neighbourhoods best.

640

grants awarded, 71% of them under 5,000

6.8 M

granted to local groups and projects

3,400

volunteers active in the year

Most of our community grants are small, quick and simple to apply for. A group can apply in one page and hear back within three weeks.

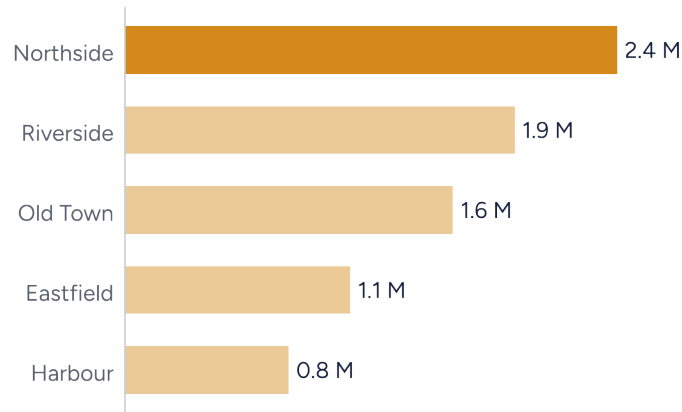

In 2025 we gave 640 grants. The most common uses were youth activities, food projects and help with energy bills, and two thirds went to groups run entirely by volunteers.

We also gave 38 larger grants of up to 60,000 to organisations that run services all year, such as advice centres and lunch clubs for older people.

Every grant holder can use our three community hubs free of charge, and 120 groups now meet there each month.

WHERE THE GRANTS WENT

FIGURE 3 — GRANTS BY NEIGHBOURHOOD, MILLIONS

Northside receives most because it has the most groups, not the largest grants.

The average grant is similar everywhere, around 9,000.

Source: Lumen grants database (illustrative). Darkest bar = largest share.

CASE STUDY · HARBOUR LARDER

A food bank that became a café

A 3,000 grant in 2023 bought a fridge. Today the Harbour Larder runs a pay-what-you-can café five days a week and employs four local people.

The grant was small. What it said to us was: we trust you to get on with it.

VOLUNTEER, HARBOUR LARDER

HOW A SMALL GRANT WORKS

01

Apply

One page, online or on paper, in any language.

02

Decide

A panel of residents decides within three weeks.

03

Report

Tell us what happened in a short call or a photo.

WHERE THE MONEY CAME FROM AND WENT

FIGURE 4 — SPENDING BY PROGRAMME, MILLIONS

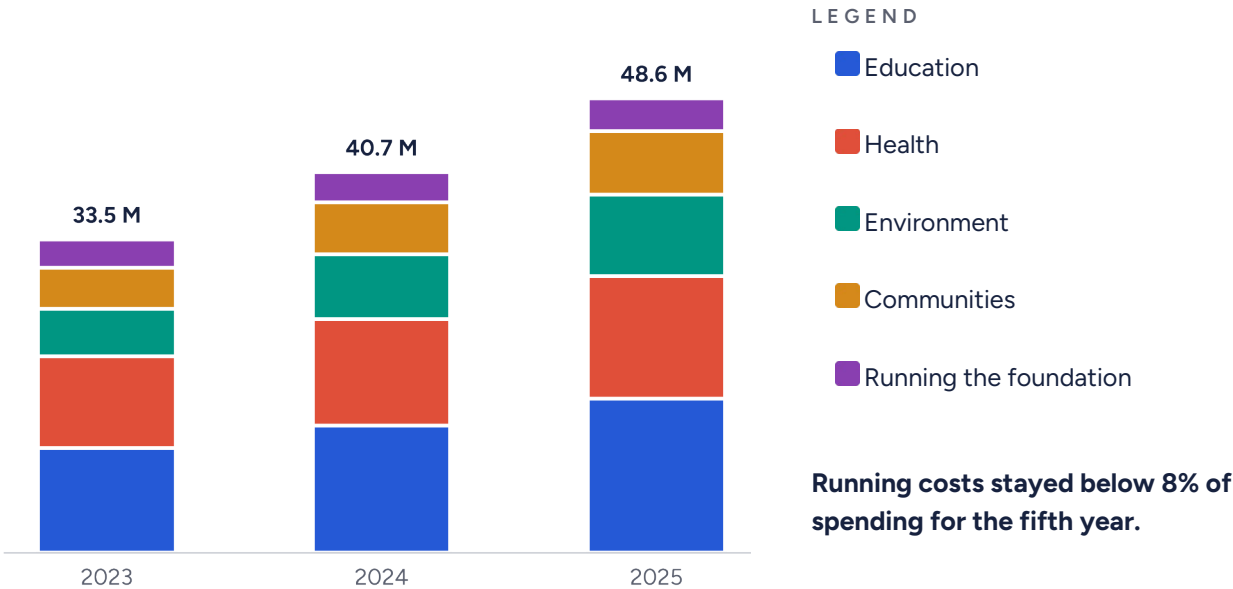

TABLE 2 — INCOME AND SPENDING, MILLIONS

INCOME

Donations and legacies	21.4
Trusts and foundations	14.9
Government contracts	8.3
Investment income	4.6
